Directional Drilling Products & Supplies

Carson Underground, Inc., a HDD Reamer & Tooling Manufacturer & Supplier, has opened a new warehouse facility in the Pacific Northwest, which will serve as the NW branch. The new facility is located at 29495 NW West Union Road, North Plains

This new Northwest warehouse further supports the company's commitment to our overall warehousing goals of supplying drillers and contractors that have time sensitive needs," said Chad Clark, territory manager for the NW branch (with 20 years experience in the HDD industry).

Carson Underground, Inc is one of the leading manufacturers and suppliers of cost-effective Directional Drilling products and supplies. We take pride in our workmanship and our goal is to have the best customer service in the industry.

HDD Drilling Industry

We provide products & parts to the pipeline, oil & gas, power and telephone industries throughout North America and beyond.

We also are distributors of many of the HDD industries top companies, including Radius, Cetco, Brewis, and others. If we don't have it, chances are

We always attempt to make it to the trade shows that concentrate on the HDD Market. Sign up for our newsletter for updates on upcoming trade shows

The NW branch was started just under three months ago and has steadily grown. The facility will include a full range of HDD reamers, benonite, grease, and HDD supplies.

Reamers

Reamers! We build them right here at our own plant. Customized to your specifications. We can get you what you need and at competitive pricing with unbeatable durability. Our stock reamer inventory items primarily target Ditch Witch®, and Vermeer® brand HDD rigs. American Augers®, Astec®, Case® available on special order. Contact our reamer experts at (888) 427-0379

Flycutter

Designed for use in sand, soft soil, and cobble. Built with carbide teeth, 1/4" water ports, and hard-facing throughout. Call for your specific rig and soil condition needs. Available from 6" to 36" inch diameter.

Digitrak F2 Remote System w/FSD

- Operates at depths up to 85 feet (25.9 meters) with 0.1% sensitive pitch without a wire.
- Includes basic advanced features of off-track locating and Target Steering® to easily and accurately navigate the drill even when obstacles prevent tracking over the drill head.
- An enhanced Target Steering® function allows the operator to place the receiver in front of the drill head, along the bore path, using a target on the remote display to steer. The operator can actually see in real time the distance and depth of the transmitter relative to the receiver.
- The F2 receiver and remote display each have an "update meter" to indicate the quality of the communication between the system components, much like signal bars on cellular telephones.
- A 4-channel radio enables multiple F2™ locators to be in the same vicinity and work up to distances of 1,800 feet (550m) plus,* making it suitable for maxi rigs.

How many times are you on the jobsite and you forgot what thread is on the adaptor? End the frustration and downtime waiting to identify your threads with the great drill rod thread gauge kit.

Carson Underground, Inc is one of the leading manufacturers and suppliers of cost-effective Directional Drilling products and supplies.
